Since 1992 I offer professional one-to-one coaching in person as well as by telephone for my busy travelling clientele. My working languages are German and English – both on a native speaker level.

My work as Executive Coach is focused on the professional and personal growth of managers, executives and entrepreneurs alike. Main areas of my expertise are:

- Executive and Management Coaching -
- Leading and Empowering Authentically
- Strategic Planning and Implementation
- Managing Change Successfully
- Handling Emotionally Charged Situations Safely
- Personal Entrepreneurial Coaching
- Career and Generational Transition

In over 20 years international corporate work I gained extensive management experience in hi-tech, chemicals, logistics, mining, finance, M&A projects, media and with leading management consultants. Intensive coach education and training followed. In the more than ten years I have since been working as an executive coach, *Human Change Coaching®* evolved, which quickly creates effective and sustainable shifts with the client.

The combination of having a broad understanding of my clients' reality as well as lots of experience as a professional coach enable me to deliver realistic and measurable results by partnering and co-creating with my clients.

Charisma and personal warmth, my business and human experience blended with my professional competence are helpful to my clients, especially when faced with unexpected change and emotionally charged situations. I want the best for my clients and challenge them to fully develop in their professional and personal lives. Pragmatic and solution focused I am fully committed to my clients success.

I partner my clients to become conscious of their present reality, gain a clear focus of their next steps, create feasible strategies and implement them successfully, thereby interconnecting personal and professional values, authenticity and ethics.

Being a credentialed and active member of the International Coach Federation (ICF) I follow their code of conduct and ethical guidelines. Continuous learning, professional supervision and development are natural to me.

In my private life I engage in reading and writing as well as facing the constant challenge of keeping my work-life balance in a dynamic and fulfilling life which I enjoy tremendously.
